### SCHRITT 4 - Selection of the door type

Select your preferred door type.

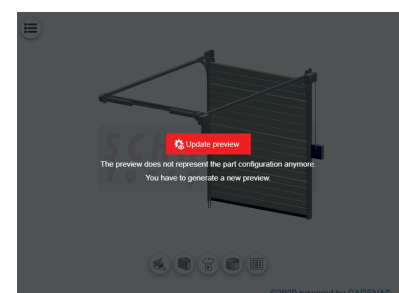

### SCHRITT 5 - Configuration of the door

Use the sliders and drop-down boxes to configure your door.

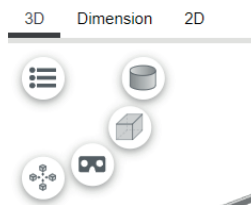

### SCHRITT 6 - Update the preview

Update the preview by clicking on „Update preview“.

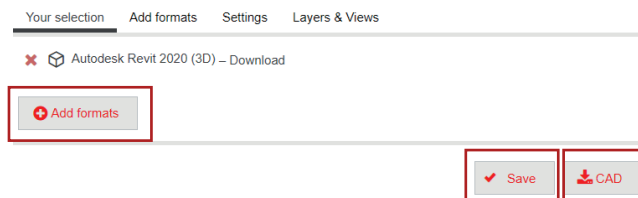

## STEP 7 - View settings

Here you can choose between 3D views, 2D views and many other variants.

## STEP 8 - Generation of the CAD model in the desired output format

Add up to 5 output formats and then click on "CAD".

## STEP 9 - Generation of a pdf data sheet (optional)

Click on "Generate PDF data sheet" and then on "Download" to create a data sheet and save it as a PDF file.

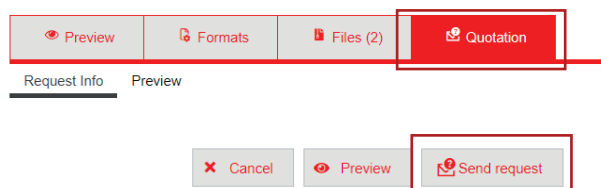

## STEP 10 - Download the product data sheet and tender texts (optional)

Click on "Specification text" or "Info PDF".

## STEP 11 - Request for quotation (optional)

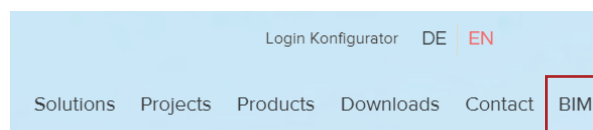

Click on "Quotation" and after checking the data on "Send request".

## FURTHER ACCESS OPTIONS

You are also welcome to access the configurator directly on our homepage.

Call up our homepage under „www.schneider.co.at“ and click on the „BIM“ tab.
